

NIPER Acronyms

flow injection system in HPLC?
fingerpoint region in IR?
trance stilbens?
alfa and beta d-glucose structure?
most suitable diluent for controlled release/
solvents in reverse phase chromatography?
RNA and DNA str?
reverse transcriptase enzyme?
chloroquin used in ..?
artemisin ?
asparaginase?
kaalischer titration?
alkaloid which is not therapeutical active?
configuration of ephedrine/
endogenous anticoagulant?
sulfonyleureas?
what happens in type 2 diabetes?
efficacy and affinity?
What is nitric oxide?
type of Ca⁺⁺ present in heart?
Action of dopamine?
antagonist of levodopa?
First law of thermodynamics/
cubic nature of NaCl?
mechanism of adaptogen/
NMR
UV calculation
mass calculation of fragments?
Fischer-Tropsch reaction.
Find diastereomers?
route of administration?
gingival hyperplasia is a side effect of?
isoprene unit of FPP?
analytical technique of noble drugs?
stop codon?
